Angled Jaw Set

The Angled Jaw set is CNC machined from 6061T-6 aluminum billet to match the slope and beam flange width of the I-beams on your project.

Fastens to the I-Beam with a case hardened 3/4" square head oval point set screw.

These angled jaws maintain the full two ton rating of the beam clamp.

Order them with a Mega-Beam Clamp and we will install them for you.

Available Angles 5°, 10°, 15°, 18°, 23°, 27.7°. Other angles available on request.

Working Load Limit	2 Tons
Case Quantities	pair
