Mega-Batten Clamp

The two-piece, Mega Batten Clamp is great way to hang 1-1/2" pipe. The tight compression fit keeps pipe from rotating within the clamp. The Mega Batten Clamp wraps around the pipe batten on both sides and fastens with two 5/16"-18 TPI socket cap screws using a 1/4" hex driver. Hand tighten the bolt next to the 1/2" hole until the top of the two pieces are flat against each other. Then install the other bolt and tighten to just 3 foot pounds, do not overtighten. Secure to structural supports through nominal 1/2" hole at top of clamp with up to a 7/16" shackle pin, quick link, or turnbuckle jaw. CNC Machined 3/16" thick x 2" wide 6061T-6 Aluminum.

When securing to truss, be sure to tighten the long side first.

Minimum Size	1.5" Pipe, 1.9" OD Pipe
Maximum Size	1.9" OD or 2" OD
Working Load Limit	1250 pounds
Hardware	5/16" x 1" socket head cap screw or 1.25" long for 2" tube 5/16" zinc plated nylon hex nut
Dimensions	5.5" tall x 2" wide x 1/4" thick
Weight	.55 pounds
Case Quantities	48
